

Digital clock

Digital clock

Opalys 14

Description :

- ▶ Indoor clock with backlit liquid crystal display (LCD).
- ▶ Hour display fixed or alternated with date, temperature...
- ▶ Extra flat casing.
- ▶ Readability 60 metres, angle of vision 160°.
- ▶ Integrated temperature probe.
- ▶ Casing colour: aluminium.
- ▶ Versions: independent quartz, radio synchronised (FI or DCF), DHF receiver, impulse slave movement, IRIG B/AFNOR coded time receiver or NTP receiver.

Technical features:

- ▶ 12 or 24 hour display mode.
- ▶ Temperature display from -40°C to +85°C or -40°F to +185°F.
- ▶ Selection °C or °F in the menu. Display resolution: 1°C. Accuracy: ±0.5°C. Offset adjustment, possible from -9.5° to +9.5° in 0.5° steps.
- ▶ Automatic summer/winter time changeover and perpetual calendar with multi-time zones.
- ▶ Permanent data saving.
- ▶ Accuracy of the time quartz base: 0.2 second/day.
- ▶ Absolute time accuracy with optional radio synchronisation.
- ▶ ABS casing, IP40 IK02.
- ▶ Silent operation.
- ▶ Programming and time setting through 2 buttons.
- ▶ External power supply 230V or PoE (Power over Ethernet) for NTP version.
- ▶ PoE consumption: 12 W maximum; Class 0 device.
- ▶ Operating temperature: from 0 to 50°C.
- ▶ Humidity: up to 80% at 40°C.
- ▶ Weight : 2 Kg.

Dimensions in mm

Accessories:

- | | |
|--|---------|
| ▶ Wall support (supplied) | 202 271 |
| ▶ Table or shelf bracket | 938 902 |
| ▶ Support for recessed mounting | 938 906 |
| ▶ Double sided bracket for ceiling mounting | 938 901 |
| ▶ Double sided bracket for wall or ceiling mounting (long length) | 938 905 |
| ▶ Single or double sided bracket specific length for wall or ceiling mounting
(Please specify on the order the fixing mode and the length between
the top of the clock and the fixing point) | 938 908 |

Opalys 14 references

- | | |
|---|----------|
| ▶ Radio synchronised France Inter | 938 622A |
| ▶ Radio synchronised DCF | 938 624A |
| ▶ Slave movement on impulses or IRIG B/AFNOR receiver | 938 633A |
| ▶ DHF radio receiver | 938 642A |
| ▶ NTP PoE receiver | 938 662A |

Réf. : 643 271 F

Display modes :

Hour only:

- ▶ 12h mode ①,
- ▶ 24h mode ②,

or alternated with :

- ▶ Day-Month (31 :12) ③,
- ▶ Month-Day (12 :31) ④,
- ▶ Temperature ⑤,
- ▶ Year ⑥,
- ▶ Week number ⑦.

Movements and synchronisation:

Quartz movement

- ▶ The clock is totally independent, the time information comes from its own time basis.
- ▶ Automatic summer/winter time changeover.

DHF movement

- ▶ The clock is radio-synchronised by a DHF transmitter.
- ▶ Automatic summer/winter time changeover.

FI or DCF Radio synchronised movement

- ▶ The clock is independent, the time information comes from its own time basis which is rectified, in case of drift, by comparing it to the FI or DCF transmitter signal.
- ▶ The radio synchronisation permit to display the time with perfect accuracy.
- ▶ Automatic summer/winter time changeover.

IRIG B/AFNOR coded time receiver

- ▶ The coded time distribution consist in transmitting a complete time message each second : the setting on time of the receivers is realised automatically and speedily as soon as they are connected on the clock line.
- ▶ The IRIG B/AFNOR coded time does not transmit interference and is insensitive to other electrical interference.

24V minute impulses receiver movement

- ▶ The receiver clocks are connected to a distribution line and activated by means of electrical impulses transmitted every minute by the master clock.

NTP PoE receiver

- ▶ A NTP time server sends UTC time periodically on the Ethernet network. The clocks pick up the time messages, apply the relevant time zone and set themselves automatically to local time. PoE power is supplied to the clock through the network via the RJ45 plug.
